BITLIBERA

Open financial freedom platform — Bitcoin, stablecoins, mobile money, merchant payments, cross-border rails

Execution starts 1 January 2027 · 2026 is a preparation year outside the agenda · All amounts in FBU

1. What we expect from this product

BitLibera is expected to become the default on-ramp between local money (Lumicash, Ecocash, Bancobu e-Noti, bank accounts) and digital value (Bitcoin, stablecoins, merchant payments). It is the payment backbone of the whole group: every other SIGHT product settles through it.

- Own the liquidity between FBU and digital assets, at a predictable spread.
- Convert retail users into merchants, then merchants into API consumers.
- Become the settlement layer for LEARN BTC, YEPO, AFJ and later SIGHT PAY.
- 8M end-users and 400k merchants by 2036, 500 M FBU ARR.

2. Economic model

Revenue line	Mechanism	Target margin
Exchange spread	0,8–1,5% on each FBU ↔ BTC/USDT conversion	70%
Transaction fees	1% capped, on merchant collections	60%
Merchant SaaS	Monthly subscription per active till	80%
Treasury / FX	Corridor spread on diaspora inflows	50%
BaaS / APIs	Per-call + revenue share with fintech partners	65%

3. Investment required

Phase	Window	Capital needed	Main use
Preparation	2026	15 M FBU	Licences, legal opinion, compliance kit, audit
Launch	2027	50 M FBU	Core ledger, KYC pipeline, liquidity float
Scale	2028–2030	200 M FBU	Liquidity depth, merchant field sales, risk engine
Regional	2031–2036	700 M FBU	Corridors, licences EAC, HSM custody, multi-region

4. Feasibility assessment

Dimension	Assessment	Condition to satisfy
Technical	High — stack already in production	Ledger correctness audit + Lightning liquidity ops
Regulatory	Medium — framework still forming	Payment-service registration, AML/CFT programme, BRB dialogue
Operational	Medium-high	Cash-in/cash-out agent network and 24/7 support
Financial	High once float is funded	Working-capital float of at least 40 M FBU
Talent	Medium	2 senior ledger engineers + 1 compliance officer

5. Technology & operating stack

- Node/TypeScript APIs, Postgres, event-sourced double-entry ledger.
- Custodial + Lightning wallets, HSM-backed key custody from 2029.
- KYC/AML pipeline with document OCR and sanctions screening.
- Real-time fraud scoring; ISO-20022 messaging for bank interconnection.

6. Key performance indicators

Metric	2027	2031	2036
Active users / month	50 000	1 000 000	8 000 000
Merchants	1 000	60 000	400 000
Monthly volume	150 M FBU	3 Mds FBU	20 Mds FBU
ARR	20 M FBU	150 M FBU	500 M FBU
Fraud loss / volume	< 0,5%	< 0,25%	< 0,1%

7. Risks & mitigations

Risk	Impact	Mitigation
Regulatory reversal	Critical	Licence-first posture, no anonymous flows, regulator reporting
FX / BTC volatility	High	Delta-neutral treasury, hedged inventory, intraday rebalancing
Liquidity shortfall	High	Multi-provider liquidity, committed credit line
Fraud & agent collusion	Medium	Device fingerprinting, agent scoring, mystery shopping

Key-person dependency	Medium	Documented runbooks, dual-control on treasury

8. Ten-year trajectory

TODAY

Dimension	Detail
Users	Early adopters, BTC traders, Burundian diaspora
Revenue	Transaction fees, FX spread
Features	BTC ↔ FBU/USD · Mobile money rails · Basic merchant payments
Market position	Burundi pioneer, first regulated-friendly BTC operator
Risks	Regulatory ambiguity · FX volatility · Liquidity
Advantage	First-mover, local trust, founder reputation
Stack	Node/TS APIs · Postgres · Lightning + custodial wallets
Team	10

1 YEAR

Dimension	Detail
Users	50k retail + 1k merchants
Revenue	20M FBU ARR
Features	Merchant SDK · Business accounts · Compliance dashboard
Market position	Default BTC + mobile money on-ramp in Burundi
Risks	Operational fraud · Banking access
Advantage	Embedded local distribution
Stack	+ Risk engine · + KYC pipeline
Team	25

5 YEARS

Dimension	Detail
Users	1M+ across EAC
Revenue	150M FBU ARR
Features	Cross-border corridors · Stablecoin treasury · Embedded finance APIs

Market position	Tier-1 financial rail in francophone East Africa
Risks	Sovereign regulation shifts · Cyber threat surface
Advantage	Owned rails, brand, capital, talent
Stack	Event-driven core ledger · ISO-20022 messaging · HSM-backed custody
Team	180

10 YEARS

Dimension	Detail
Users	8M end-users, 400k merchants
Revenue	500M FBU ARR
Features	Banking-as-a-Service for fintechs · Treasury & FX desk · BTC + stablecoin liquidity
Market position	Top-3 financial infrastructure operator in East Africa
Risks	Geopolitics, capital controls
Advantage	Network effect across merchants + BaaS partners
Stack	Multi-region active-active core · Real-time fraud ML
Team	650

MATURE

Dimension	Detail
Users	Foundational rail behind PAY · ID · MARKET
Revenue	Largest revenue contributor
Features	Open developer APIs · Programmable money · Embedded BTC + CBDC support
Market position	Critical infrastructure
Risks	Systemic — treated as regulated infrastructure
Advantage	Hard-to-displace incumbent
Stack	Sovereign cloud + multi-tenant ledger
Team	Part of group operations
