Priorities

What must be done, in which order, and by when.

Execution starts 1 January 2027 · 2026 is a preparation year outside the agenda · All amounts in FBU

0. Preparation year 2026 — before the agenda

2026 is used to prepare: legal structuring, group identity, capital, first hires and product readiness. Execution officially starts on 1 January 2027.

- Legal structuring of the group and the first subsidiaries.
- Group identity, brand system and single sign-on design.
- Capital: bootstrap discipline plus first angel commitments.
- First senior hires and product readiness reviews.

1. Yearly priorities (2027 → 2036)

2027 — Foundation & Brand

- Consolidate the four existing products under one SIGHT AFRICA group identity
- Stabilize BitLibera as a profitable BTC + mobile-money corridor
- Launch Africa Fintech Journal as a recognized regional publication

Revenue target	Team	Key releases
12M FBU ARR	18 → 35	BitLibera 2.0 (merchant pilot) · LEARN BTC certificate program v1 · AFJ weekly editorial

2028 — Validation & Repeatability

- Open Bujumbura HQ + first satellite office in Kigali
- Reach product-market fit on Yepo for African SMEs accessing AI
- Launch SIGHT ID pilot for KYC across group products

Revenue target	Team	Key releases
30M FBU ARR	35 → 80	Yepo Business · SIGHT ID alpha · AFJ research reports

2029 — Growth — Regional Footprint

- Cross-border payments live (BI ↔ RW ↔ DRC)
- Launch SIGHT ACADEMY as standalone institution
- First sovereign cloud zone (SIGHT CLOUD Lake Tanganyika)

Revenue target	Team	Key releases
70M FBU ARR	80 → 220	SIGHT PAY v1 · SIGHT ACADEMY cohort 1 · SIGHT CLOUD region 1

2030 — Platformization

- Open public APIs across PAY, ID, CLOUD
- Launch SIGHT CAPITAL fund I (60M FBU)
- Begin SIGHT LABS R&D center on applied AI and cryptography

Revenue target	Team	Key releases
140M FBU ARR	220 → 480	Developer portal · SIGHT CAPITAL fund I · SIGHT LABS

2031 — National Milestone Consolidation

- Become the de-facto digital integration partner for Burundian state services
- Hit 5M end-users across the group
- Launch SIGHT SECURITY as standalone subsidiary

Revenue target	Team	Key releases
240M FBU ARR	480 → 900	SIGHT SECURITY SOC · Government services integration · AFJ data & research division

2032 — Regional Expansion

- Enter Tanzania, Kenya, Uganda commercially
- Launch SIGHT DATA — analytics & data infrastructure
- Series B equivalent: 250M FBU growth round

Revenue target	Team	Key releases
380M FBU ARR	900 → 1,500	SIGHT DATA · Multi-currency PAY corridors · Regional merchant network

2033 — Infrastructure Leadership

- Position SIGHT CLOUD as preferred sovereign cloud for francophone Africa
- Launch SIGHT MARKET — cross-border digital commerce rails
- Establish governance & board for IPO-ready maturity

Revenue target	Team	Key releases
550M FBU ARR	1,500 → 2,400	SIGHT MARKET · Sovereign cloud certification · Independent board

2034 — AI & Compute Sovereignty

- Stand up African-owned GPU compute via SIGHT LABS
- Yepo becomes the default AI access layer for African SMEs
- Cross-listing readiness (NSE / regional exchanges)

Revenue target	Team	Key releases
750M FBU ARR	2,400 → 3,400	SIGHT COMPUTE (GPU cloud) · Yepo Enterprise · Regulatory readiness pack

2035 — Institutional Scale

- Operate in 7 countries; revenue diversification across 4 segments
- SIGHT CAPITAL fund II (200M FBU)
- Mature M&A engine for adjacent assets

Revenue target	Team	Key releases
1 Md FBU ARR	3,400 → 4,200	Fund II · First two acquisitions (paytech, edtech) · Group ERP & financial backbone

2036 — Foundational Infrastructure

- 9 countries, 1,3 Md FBU ARR, recognized critical infrastructure operator
- Public listing or strategic long-term capital partnership
- Established African-owned alternative across PAY · ID · CLOUD · DATA · SECURITY

Revenue target	Team	Key releases
1,3 Md FBU ARR	4,200 → 4,800	IPO / strategic listing · 20-year national infrastructure compact (BI) · Pan-African API standard contributions

2. Subsidiary launch order (2 to 3 per year)

Rank	Entity	Role	Launch year	Why now
1	SIGHT ID	Digital identity	2027	First dependency of everything else: reusable KYC and authentication across group products + third parties — the trust layer.
2	SIGHT PAY	Regional payment network	2027	Acquiring + cross-border rails connecting MNOs, banks and BTC liquidity. Monetises the existing BitLibera base immediately.
3	SIGHT ACADEMY	Talent institution	2027	Nothing scales without engineers and operators. Formalises LEARN BTC into the group's hiring pipeline from year one.
4	SIGHT SECURITY	Cybersecurity infra & SOC	2028	Payments and identity cannot run unprotected. Becomes a managed service sold to banks and public bodies.
5	SIGHT DATA	Data & analytics infra	2028	Group data platform once PAY and ID generate volume; commercial analytics for banks, MNOs, regulators.
6	SIGHT MEDIA	Media holding (AFJ + adjacencies)	2028	Cheap to stand up, compounds distribution and institutional credibility for every later launch.
7	SIGHT CLOUD	Sovereign cloud	2029	Local data residency for governments and regulated industries — required before any public-sector contract.

8	SIGHT GOV	Government services platform	2029	White-label civic stack: portals, payments, ID, records. Activated as soon as sovereign hosting exists.
9	SIGHT FOUNDATION	Public-interest arm	2029	Open-source, scholarships, civic tech. Protects the social license before the group becomes systemically visible.
10	SIGHT LABS	Applied R&D	2030	Cryptography, AI, hardware, civic tech — funded only once core products produce cash.
11	SIGHT CAPITAL	Venture arm + fund	2030	Backs adjacent founders, sources M&A, extends the ecosystem once the balance sheet allows it.
12	SIGHT MARKET	Digital commerce rails	2031	Catalog + checkout + logistics handoff for SME commerce, built on top of PAY and ID.
13	SIGHT COMPUTE	African GPU cloud	2031	AI sovereignty requires owned compute. Follows CLOUD and Yepo demand — otherwise we stay tenants forever.
14	SIGHT AGRI	Agricultural data & finance	2032	Combines DATA + PAY + COMPUTE for the continent's largest sector — needs all three to exist first.
15	SIGHT HEALTH	Health-data infrastructure	2032	Highest regulatory bar; launched last, on mature ID, CLOUD and SECURITY foundations.

3. Phase priorities

Phase	Years	Priority goals	Revenue	Funding
Foundation	2027	Unify group identity · Stabilize MS + AFJ + Yepo + LEARN BTC · Establish governance	12M FBU	Bootstrap + small angel (25M FBU)
Validation	2028	Repeatable revenue per product · Hire senior product/eng · Define group platform v0	30M FBU	Seed round 25–50M FBU (strategic angels + 1 African VC)
Growth	2029–2030	Launch sovereign infrastructure (CLOUD, GOV) · Open APIs · Open Kigali office	70M → 140M FBU	Series A 80–150M FBU + DFI co-investment
Regional Expansion	2031–2033	Operate in 3+ countries · Government contracts · Sovereign cloud certifications	240M → 550M FBU	Series B/C 250–500M FBU; blended capital with DFIs
Infrastructure Leadership	2034–2036	Foundational infra status · Public listing or strategic capital · African-owned compute	750M → 1,3 Md FBU	Pre-IPO / IPO / strategic minority partner

4. Non-negotiable sequencing rules

- Nothing launches before its dependency exists: ID before PAY, PAY before MARKET, CLOUD before GOV.
- A new entity is created only when internal demand already covers at least half of its cost base.
- Cash-generating products keep priority over infrastructure ambitions in any given year.
- Maximum three new entities per year — beyond that, execution quality collapses.
- Every priority carries one owner, one deadline and one measurable indicator.
