- 3. Roadmap
- 4. Products
- 5. Future Build
- 6. Organization
- 7. Phases
- 8. Financials
- 9. Playbook
- 10. Ecosystem

1. Overview

Vision

Become the leader in technology integration in Burundi by 2030 while promoting national digital sovereignty and contributing to Burundi Vision 2040–2060.

Mission

Provide advanced technologies, secure software solutions and local capacity building to accelerate digital transformation across Burundi and East Africa.

Values

- Integrity
- Innovation
- Sovereignty
- Excellence

Strategic Pillars

Sovereignty: African-owned rails: payments, identity, cloud, AI compute.
Integration: Each product reinforces the others; the group compounds.
Talent: Build the institution that produces our future operators.
Capital discipline: Cash-generating products fund the ambitious bets.

2. Vision 2036 — End State

The dominant digital infrastructure group of East Africa: the rails for payments, identity, cloud and AI across Burundi, Rwanda, DRC, Tanzania, Kenya, Uganda — with strategic footprints in Ethiopia and Zambia.

Headline KPIs (2036)

Active end-users	32M+ — across consumer and merchant platforms
Merchants on SIGHT PAY	1.2M — from kiosks to enterprises
Annual revenue	18 Mds FBU — blended infrastructure + platform
Employees	4,800 — with 70% engineering & operations
Countries operated	9 — EAC + selected southern markets
Data centers	4 — sovereign cloud regions
Bitcoin liquidity (regional)	Top 3 — across East Africa
Capital deployed via SIGHT CAPITAL	3,5 Mds FBU — into 90+ African startups

Strategic Influence

- Designated national digital infrastructure partner of Burundi.
- Member of the EAC Digital Economy advisory council.
- Operator of the largest African-owned AI compute capacity outside South Africa and Nigeria.
- Reference education partner for fintech, AI and cybersecurity curricula in 5 universities.

3. Roadmap (2027–2036)

2026 — Preparation year — outside the agenda

2026 is used to prepare: legal structuring, group identity, capital, first hires and product readiness. Execution officially starts on 1 January 2027.

2027 — Foundation & Brand

Revenue target: 15M FBU ARR
Team: 18 → 35

Priorities

- Consolidate the four existing products under one SIGHT AFRICA group identity
- Stabilize My Satoshis as a profitable BTC + mobile-money corridor
- Launch Africa Fintech Journal as a recognized regional publication

Key releases

- My Satoshis 2.0 (merchant pilot)
- LEARN BTC certificate program v1
- AFJ weekly editorial

Infrastructure

- Group brand system
- Single SSO across products
- Shared data platform v0

Partners

- 2 Burundian banks
- Regional MNOs
- Africa Bitcoin community

2028 — Validation & Repeatability

Revenue target: 60M FBU ARR
Team: 35 → 80

Priorities

- Open Bujumbura HQ + first satellite office in Kigali
- Reach product-market fit on Yepo for African SMEs accessing AI
- Launch SIGHT ID pilot for KYC across group products

Key releases

- Yepo Business
- SIGHT ID alpha
- AFJ research reports

Infrastructure

- Group payments rails v1
- Internal compliance & risk function

Partners

- Telco partnerships in Burundi & Rwanda
- 2 regional fintech alliances

2029 — Growth — Regional Footprint

Revenue target: 220M FBU ARR
Team: 80 → 220

Priorities

- Cross-border payments live (BI ↔ RW ↔ DRC)
- Launch SIGHT ACADEMY as standalone institution
- First sovereign cloud zone (SIGHT CLOUD Lake Tanganyika)

Key releases

- SIGHT PAY v1
- SIGHT ACADEMY cohort 1
- SIGHT CLOUD region 1

Infrastructure

- Tier-III data center partnership
- Regional NOC

Partners

- Central banks (BRB, BNR)
- World Bank / AfDB digital programs

2030 — Platformization

Revenue target: 600M FBU ARR
Team: 220 → 480

Priorities

- Open public APIs across PAY, ID, CLOUD
- Launch SIGHT CAPITAL fund I (450M FBU)
- Begin SIGHT LABS R&D center on applied AI and cryptography

Key releases

- Developer portal
- SIGHT CAPITAL fund I
- SIGHT LABS

Infrastructure

- API gateway
- Multi-tenant identity & permissions

Partners

- 3 universities
- International VCs as LPs

2031 — National Milestone Consolidation

Revenue target: 1,5 Md FBU ARR
Team: 480 → 900

Priorities

- Become the de-facto digital integration partner for Burundian state services
- Hit 5M end-users across the group
- Launch SIGHT SECURITY as standalone subsidiary

Key releases

- SIGHT SECURITY SOC
- Government services integration
- AFJ data & research division

Infrastructure

- Second cloud region
- National cyber response capability

Partners

- Government of Burundi
- EAC Secretariat

2032 — Regional Expansion

Revenue target: 3 Mds FBU ARR
Team: 900 → 1,500

Priorities

- Enter Tanzania, Kenya, Uganda commercially
- Launch SIGHT DATA — analytics & data infrastructure
- Series B equivalent: 1,2 Md FBU growth round

Key releases

- SIGHT DATA
- Multi-currency PAY corridors
- Regional merchant network

Infrastructure

- Three operating countries
- Regional support & compliance org

Partners

- Pan-African banks
- Visa / Mastercard regional

2033 — Infrastructure Leadership

Revenue target: 5,5 Mds FBU ARR
Team: 1,500 → 2,400

Priorities

- Position SIGHT CLOUD as preferred sovereign cloud for francophone Africa
- Launch SIGHT MARKET — cross-border digital commerce rails
- Establish governance & board for IPO-ready maturity

Key releases

- SIGHT MARKET
- Sovereign cloud certification
- Independent board

Infrastructure

- Third data center
- Independent audit & risk framework

Partners

- Francophone African governments
- Tier-1 global cloud reseller alliances

2034 — AI & Compute Sovereignty

Revenue target: 9 Mds FBU ARR
Team: 2,400 → 3,400

Priorities

- Stand up African-owned GPU compute via SIGHT LABS
- Yepo becomes the default AI access layer for African SMEs
- Cross-listing readiness (NSE / regional exchanges)

Key releases

- SIGHT COMPUTE (GPU cloud)
- Yepo Enterprise

- Regulatory readiness pack

Infrastructure

- GPU clusters
- Carrier-neutral interconnects

Partners

- NVIDIA / AMD reseller frameworks
- Universities & research

2035 — Institutional Scale

Revenue target: 13 Mds FBU ARR
Team: 3,400 → 4,200

Priorities

- Operate in 7 countries; revenue diversification across 4 segments
- SIGHT CAPITAL fund II (1,8 Md FBU)
- Mature M&A engine for adjacent assets

Key releases

- Fund II
- First two acquisitions (paytech, edtech)
- Group ERP & financial backbone

Infrastructure

- Fourth data center
- Continental operations center

Partners

- DFIs as long-term capital
- Regional sovereign funds

2036 — Foundational Infrastructure

Revenue target: 18 Mds FBU ARR
Team: 4,200 → 4,800

Priorities

- 9 countries, 18 Mds FBU ARR, recognized critical infrastructure operator
- Public listing or strategic long-term capital partnership
- Established African-owned alternative across PAY · ID · CLOUD · DATA · SECURITY

Key releases

- IPO / strategic listing
- 20-year national infrastructure compact (BI)
- Pan-African API standard contributions

Infrastructure

- Resilient multi-region, multi-country backbone

Partners

- EAC
- AU Digital Transformation Strategy

3b. Extended Roadmap (2037–2046)

The 20-year horizon extends the 10-year plan with a second decade: consolidation after IPO, AI industrialization, pan-African reach, sovereign cloud standard, and continental infrastructure. Years 2027–2036 remain as defined in section 3.

2037 — Post-IPO Consolidation

Revenue target: 23 Mds FBU ARR
Team: 4,800 → 5,600

Priorities

- Integrate two acquisitions per year across PAY, DATA and MEDIA
- Reach 40M end-users across the group
- Stand up SIGHT FOUNDATION endowment at 600M FBU

Key releases

- Group operating model v3
- SIGHT FOUNDATION endowment
- Pan-African PAY corridor

Infrastructure

- Fifth data center
- Continental settlement layer

Partners

- AU Digital Strategy
- AfCFTA digital task force

2038 — AI Industrialization

Revenue target: 30 Mds FBU ARR
Team: 5,600 → 6,400

Priorities

- African-language LLM family in production across SIGHT COMPUTE

- Yepo Enterprise serving 50k SMEs continent-wide
- Capital recycling: SIGHT CAPITAL Fund III (3 Mds FBU)

Key releases

- Kirundi/Swahili LLMs v2
- Yepo Industry Agents
- Fund III

Infrastructure

- Dedicated GPU corridor (BI ↔ RW ↔ KE)
- Edge inference network

Partners

- AfDB AI fund
- African universities consortium

2039 — Pan-African Reach

Revenue target: 38 Mds FBU ARR
Team: 6,400 → 7,200

Priorities

- Commercial entry in Ethiopia, Zambia and Senegal
- Cross-border PAY processing 25% of intra-EAC digital flows
- Critical-infrastructure status recognized in 3 countries

Key releases

- SIGHT PAY ET / ZM / SN
- Regional resilience compact
- Group ESG framework

Infrastructure

- Three new operating countries
- Pan-African NOC

Partners

- BoZ, NBE, BCEAO
- ECOWAS digital programs

2040 — Sovereign Cloud Standard

Revenue target: 46 Mds FBU ARR
Team: 7,200 → 8,000

Priorities

- SIGHT CLOUD becomes the default sovereign cloud across francophone Africa
- Public-sector revenue crosses 30% of group ARR
- Industrial-grade SIGHT SECURITY MSSP for governments

Key releases

- Sovereign Cloud certification v2
- Government SOC framework
- SIGHT DATA marketplace

Infrastructure

- Sixth data center
- Cross-border classified network

Partners

- Francophone heads-of-state digital council
- ITU

2041 — Burundi Vision 2040 Delivery

Revenue target: 55 Mds FBU ARR
Team: 8,000 → 8,800

Priorities

- Deliver Burundi Vision 2040 digital backbone in production
- 60M end-users; 3M merchants across the group
- Spin out SIGHT HEALTH and SIGHT AGRI as independent listed subsidiaries

Key releases

- BI 2040 backbone v1
- SIGHT HEALTH listing
- SIGHT AGRI listing

Infrastructure

- National multi-region redundancy
- Health & agri data lakes

Partners

- Government of Burundi
- WHO, FAO regional

2042 — Capital Ecosystem

Revenue target: 65 Mds FBU ARR
Team: 8,800 → 9,500

Priorities

- SIGHT CAPITAL becomes the largest African-owned tech investor by deployed capital
- Launch SIGHT CAPITAL public infrastructure fund (5 Mds FBU)
- M&A engine completes 4–6 deals/year

Key releases

- Public infra fund I
- Group M&A playbook v2
- Founder-in-residence program

Infrastructure

- Group treasury operations center
- Continental compliance hub

Partners

- Sovereign wealth funds (GCC, ZA)
- Global DFIs as anchor LPs

2043 — Compute Sovereignty

Revenue target: 75 Mds FBU ARR
Team: 9,500 → 10,500

Priorities

- African-owned GPU fleet crosses 25,000 high-end accelerators
- Foundation models trained end-to-end on SIGHT COMPUTE
- Carrier-neutral fiber across 5 corridors

Key releases

- SIGHT COMPUTE v3
- African foundation model family
- Fiber corridor program

Infrastructure

- Seventh data center (carrier hotel)
- Subsea cable landing partnerships

Partners

- NVIDIA / AMD strategic
- African research alliance

2044 — Standards & Influence

Revenue target: 85 Mds FBU ARR
Team: 10,500 → 11,500

Priorities

- Lead drafting of pan-African digital infrastructure standards
- SIGHT ID adopted as reusable identity layer in 6 countries
- Group becomes net exporter of African-built software

Key releases

- Pan-African ID standard v1
- Open source contribution program

- Group developer summit

Infrastructure

- Inter-country ID federation
- Public standards body seat

Partners

- AU Commission
- Smart Africa Alliance

2045 — Generational Transition

Revenue target: 95 Mds FBU ARR
Team: 11,500 → 12,200

Priorities

- Founder transition into chair role; second-generation CEO in place
- Long-duration capital structure finalized (sovereign + DFI anchors)
- Endowment funding 100% of SIGHT FOUNDATION operations

Key releases

- Governance v3
- Sovereign anchor partnership
- Foundation flagship programs

Infrastructure

- Independent group board operating model
- Succession-tested leadership bench

Partners

- Regional sovereign funds
- Major university endowments

2046 — Continental Infrastructure

Revenue target: 110 Mds FBU ARR
Team: 12,200 → 13,000

Priorities

- 100M end-users; recognized critical infrastructure operator in 12 countries
- Revenue diversified across PAY, CLOUD, DATA, COMPUTE, SECURITY, HEALTH, AGRI
- Anchor of an African-owned digital economy alternative

Key releases

- 20-year compact extension
- Continental interconnect
- African digital economy report

Infrastructure

- Multi-continent resilient backbone
- African-owned compute + identity standard

Partners

- AU, EAC, ECOWAS, SADC
- Global multilateral institutions

4. Products — Evolution

MY SATOSHIS

Digital financial platform — Bitcoin exchange, mobile money, local payments.

Today

Users	Early adopters, BTC traders, Burundian diaspora
Revenue	Transaction fees, FX spread
Market	Burundi pioneer, first regulated-friendly BTC operator
Advantage	First-mover, local trust, founder reputation
Team	10
Features	BTC ↔ FBU/USD · Mobile money rails · Basic merchant payments
Risks	Regulatory ambiguity · FX volatility · Liquidity
Stack	Node/TS APIs · Postgres · Lightning + custodial wallets

1 Year

Users	50k retail + 1k merchants
Revenue	30M FBU ARR
Market	Default BTC + mobile money on-ramp in Burundi
Advantage	Embedded local distribution
Team	25
Features	Merchant SDK · Business accounts · Compliance dashboard
Risks	Operational fraud · Banking access
Stack	+ Risk engine · + KYC pipeline

5 Years

Users	1M+ across EAC
Revenue	700M FBU ARR
Market	Tier-1 financial rail in francophone East Africa

Advantage	Owned rails, brand, capital, talent
Team	180
Features	Cross-border corridors · Stablecoin treasury · Embedded finance APIs
Risks	Sovereign regulation shifts · Cyber threat surface
Stack	Event-driven core ledger · ISO-20022 messaging · HSM-backed custody

10 Years

Users	8M end-users, 400k merchants
Revenue	4,5 Mds FBU ARR
Market	Top-3 financial infrastructure operator in East Africa
Advantage	Network effect across merchants + BaaS partners
Team	650
Features	Banking-as-a-Service for fintechs · Treasury & FX desk · BTC + stablecoin liquidity
Risks	Geopolitics, capital controls
Stack	Multi-region active-active core · Real-time fraud ML

Mature

Users	Foundational rail behind PAY · ID · MARKET
Revenue	Largest revenue contributor
Market	Critical infrastructure
Advantage	Hard-to-displace incumbent
Team	Part of group operations
Features	Open developer APIs · Programmable money · Embedded BTC + CBDC support
Risks	Systemic — treated as regulated infrastructure
Stack	Sovereign cloud + multi-tenant ledger

LEARN BTC

Bitcoin & digital economy education — community, meetups, programs.

Today

Users	Community of ~500 learners
Revenue	Sponsorships, donations
Market	Reference BTC community in Burundi
Advantage	Trust + grassroots reach
Team	5 + volunteers
Features	Meetups · Workshops
Risks	Volunteer dependency
Stack	WordPress / lightweight web

1 Year

Users	3k learners
Revenue	4M FBU (programs + sponsorships)
Market	Formal learning provider
Advantage	Local-language content
Team	12
Features	Online cohorts · Certificates
Risks	Content scaling
Stack	LMS + cohort tooling

5 Years

Users	60k learners across EAC
Revenue	120M FBU (programs + B2B)
Market	Regional digital economy school
Advantage	Local + diaspora alumni network
Team	80

Features	Corporate training · Fintech, AI & cybersecurity tracks
Risks	Accreditation cycles
Stack	Proprietary LMS · Live cohort infra

10 Years

Users	300k+ alumni
Revenue	700M FBU
Market	SIGHT ACADEMY brand — regional reference
Advantage	Alumni → SIGHT employees, founders, partners
Team	300
Features	University partnerships · National curriculum input
Risks	Talent retention
Stack	AI-personalized learning

Mature

Users	Pan-African talent engine
Revenue	Recurring B2B + government contracts
Market	Tier-1 African tech institution
Advantage	Talent moat for the entire group
Team	Standalone subsidiary
Features	Apprenticeships · Research
Risks	Mission drift
Stack	Integrated with SIGHT LABS

AFRICA FINTECH JOURNAL

Independent media + research covering fintech, BTC, AI, startups, cyber.

Today

Users	Pre-launch / early readership
Revenue	0
Market	Niche regional fintech voice
Advantage	First-mover, founder credibility
Team	3
Features	Editorial pipeline · Newsletter
Risks	Editorial quality
Stack	Ghost/Notion + CDN

1 Year

Users	25k subscribers
Revenue	6M FBU (sponsorship + events)
Market	Reference fintech publication in francophone Africa
Advantage	Trusted independent voice
Team	8
Features	Weekly newsletter · Quarterly reports
Risks	Ad revenue volatility
Stack	Headless CMS

5 Years

Users	250k subscribers, 1M readers
Revenue	150M FBU (research + events + sponsorship)
Market	African fintech category-defining media
Advantage	Owned audience + data
Team	45
Features	Premium research · Industry awards · Annual summit
Risks	Independence vs. monetization
Stack	Custom publishing platform

10 Years

Users	1M+ professional audience
Revenue	600M FBU
Market	Standard reference for African digital economy
Advantage	Proprietary data + relationships
Team	180
Features	Research-as-a-service · Indices & benchmarks
Risks	Disruption from AI-generated content
Stack	Data products + AI publishing

Mature

Users	Institutional clients (banks, DFIs, regulators)
Revenue	High-margin recurring
Market	Equivalent of FT/Stratechery for African digital economy
Advantage	Editorial independence + data moat
Team	Standalone media subsidiary
Features	Africa Fintech Index · Policy advisory
Risks	Trust capital
Stack	Internal AI editorial copilots

YEPO

AI marketplace — Africans access global AI services with local payment.

Today

Users	Early users
Revenue	Small margins on AI credits
Market	Niche but unique in BI

Advantage	Payment localization
Team	4
Features	Local payment for AI APIs
Risks	AI provider terms
Stack	Provider APIs + My Satoshis billing

1 Year

Users	10k users + 200 SMEs
Revenue	12M FBU
Market	AI access default for francophone Africa
Advantage	Distribution + billing
Team	15
Features	Yepo Business · Prompt library
Risks	Margin compression
Stack	Multi-provider router

5 Years

Users	500k users, 8k SMEs
Revenue	500M FBU
Market	African AI consumption platform
Advantage	Local context + integrations
Team	120
Features	Verticalized AI agents (legal, accounting, ag) · Local LLM fine-tunes
Risks	Foundation model price wars
Stack	Orchestration layer · Vector + RAG infra

10 Years

Users	5M users, 80k SMEs

Revenue	2,7 Mds FBU
Market	AI infrastructure for the continent
Advantage	GPU access + local talent
Team	420
Features	Yepo Compute (GPUs) · African-language LLMs
Risks	Compute sovereignty
Stack	Owned GPU clusters via SIGHT COMPUTE

Mature

Users	Default AI layer of the group
Revenue	Strategic infrastructure
Market	Pan-African AI platform
Advantage	Owned compute + audience + payments
Team	Standalone subsidiary
Features	Agent marketplace · Industry copilots
Risks	Geopolitical compute access
Stack	Vertically integrated

5. Future Build — Planned Subsidiaries

SIGHT ID — Digital identity (born 2027)

First dependency of everything else: reusable KYC and authentication across group products + third parties — the trust layer.

SIGHT PAY — Regional payment network (born 2027)

Acquiring + cross-border rails connecting MNOs, banks and BTC liquidity. Monetises the existing My Satoshis base immediately.

SIGHT ACADEMY — Talent institution (born 2027)

Nothing scales without engineers and operators. Formalises LEARN BTC into the group's hiring pipeline from year one.

SIGHT SECURITY — Cybersecurity infra & SOC (born 2028)

Payments and identity cannot run unprotected. Becomes a managed service sold to banks and public bodies.

SIGHT DATA — Data & analytics infra (born 2028)

Group data platform once PAY and ID generate volume; commercial analytics for banks, MNOs, regulators.

SIGHT MEDIA — Media holding (AFJ + adjacencies) (born 2028)

Cheap to stand up, compounds distribution and institutional credibility for every later launch.

SIGHT CLOUD — Sovereign cloud (born 2029)

Local data residency for governments and regulated industries — required before any public-sector contract.

SIGHT GOV — Government services platform (born 2029)

White-label civic stack: portals, payments, ID, records. Activated as soon as sovereign hosting exists.

SIGHT FOUNDATION — Public-interest arm (born 2029)

Open-source, scholarships, civic tech. Protects the social license before the group becomes systemically visible.

SIGHT LABS — Applied R&D (born 2030)

Cryptography, AI, hardware, civic tech — funded only once core products produce cash.

SIGHT CAPITAL — Venture arm + fund (born 2030)

Backs adjacent founders, sources M&A, extends the ecosystem once the balance sheet allows it.

SIGHT MARKET — Digital commerce rails (born 2031)

Catalog + checkout + logistics handoff for SME commerce, built on top of PAY and ID.

SIGHT COMPUTE — African GPU cloud (born 2031)

AI sovereignty requires owned compute. Follows CLOUD and Yepo demand — otherwise we stay tenants forever.

SIGHT AGRI — Agricultural data & finance (born 2032)

Combines DATA + PAY + COMPUTE for the continent's largest sector — needs all three to exist first.

SIGHT HEALTH — Health-data infrastructure (born 2032)

Highest regulatory bar; launched last, on mature ID, CLOUD and SECURITY foundations.

6. Organization

Today — ~15

- Founder + ops
- My Satoshis eng
- LEARN BTC community
- AFJ editorial (forming)
- Yepo eng

1 Year — ~35

- CEO + COO
- Product (per product)
- Eng + SRE shared
- Compliance & Risk
- Marketing & Community
- Finance

5 Years — ~500

- Group CEO, CFO, COO, CTO, CISO, Chief Legal, Chief People
- Product subsidiaries (My Satoshis, Yepo, AFJ, Academy)
- Infrastructure: Cloud, ID, PAY, Security
- SIGHT LABS (R&D)
- SIGHT CAPITAL
- Regional country managers (BI, RW, DRC)

10 Years — ~4,800

- Group holding + independent board
- 9 country org with regional hubs
- Each subsidiary with its own P&L, MD and board
- Group platform org: PAY · ID · CLOUD · DATA · SECURITY

- SIGHT LABS as standalone R&D entity
- SIGHT CAPITAL with external LPs
- SIGHT FOUNDATION

7. Phases

Foundation (2027)

Revenue: 15M FBU
Hiring: +20
Funding: Bootstrap + small angel (90M FBU)
Execution: Tight focus on cashflow products; ruthlessly cut non-essential scope.

Goals

- Unify group identity
- Stabilize MS + AFJ + Yepo + LEARN BTC
- Establish governance

KPIs

- Monthly active users
- Gross margin per product
- Operational uptime

Products in flight

- MS v2
- AFJ launch
- Yepo public
- SIGHT ID
- SIGHT PAY
- SIGHT ACADEMY

Risks

- Founder bandwidth
- Regulatory clarity

Validation (2028)

Revenue: 60M FBU
Hiring: +45

Funding: Seed round 60–120M FBU (strategic angels + 1 African VC)
Execution: Centralize platform (SSO, payments, data) while keeping product autonomy.

Goals

- Repeatable revenue per product
- Hire senior product/eng
- Define group platform v0

KPIs

- ARR growth
- CAC payback
- Retention

Products in flight

- Yepo Business
- MS Merchant
- SIGHT SECURITY
- SIGHT DATA
- SIGHT MEDIA

Risks

- Hiring quality
- Compliance build-out

Growth (2029–2030)

Revenue: 220M → 600M FBU
Hiring: +340
Funding: Series A 300–450M FBU + DFI co-investment
Execution: Adopt subsidiary structure; introduce country managers; harden security & compliance.

Goals

- Launch sovereign infrastructure (CLOUD, GOV)
- Open APIs
- Open Kigali office

KPIs

- Platform revenue %
- API consumers
- Cross-product usage

Products in flight

- SIGHT CLOUD r1
- SIGHT GOV
- SIGHT FOUNDATION
- SIGHT LABS
- SIGHT CAPITAL
- Developer portal

Risks

- Operational complexity
- Talent ceiling

Regional Expansion (2031–2033)

Revenue: 1,5 → 5,5 Mds FBU

Hiring: +1,500

Funding: Series B/C 1,2–2,4 Mds FBU; blended capital with DFIs

Execution: Independent group board, audit committee, ERM framework, country compliance officers.

Goals

- Operate in 3+ countries
- Government contracts
- Sovereign cloud certifications

KPIs

- Cross-border TPV
- Government deals
- Sovereign workloads hosted

Products in flight

- SIGHT MARKET
- SIGHT COMPUTE
- SIGHT AGRI
- SIGHT HEALTH

Risks

- Regulatory fragmentation
- FX exposure
- Cyber threats

Infrastructure Leadership (2034–2036)

Revenue: 9 → 18 Mds FBU
Hiring: +2,400
Funding: Pre-IPO / IPO / strategic minority partner
Execution: IPO readiness: financial controls, board independence, M&A engine, ESG.

Goals

- Foundational infra status
- Public listing or strategic capital
- African-owned compute

KPIs

- Critical-infra designation
- Free cash flow
- Regional market share

Products in flight

- Yepo Enterprise
- Pan-African APIs
- Group platform consolidation

Risks

- Geopolitical pressure

- Scale governance

8. Financial Strategy

Foundation

Bootstrap	MS fees, LEARN BTC programs, AFJ sponsorships
Revenue	Transaction fees, programs, ads
Grants	Bitcoin Foundation, OSI-aligned funds
Partnerships	Local banks, MNOs
Investors	Angels (BTC + diaspora)
Venture	Not yet
Sustainability	Strict cost discipline; founder time = capital

Validation

Bootstrap	Yepo margins, MS B2B
Revenue	ARR per product
Grants	AfDB digital, GIZ, USADF
Partnerships	Telcos, 2 banks
Investors	African seed funds
Venture	Seed 60–120M FBU
Sustainability	Unit economics gate before scale spend

Growth

Bootstrap	Cross-sell across group
Revenue	Platform + SaaS + interchange
Grants	World Bank digital programs
Partnerships	Central banks, EAC
Investors	African + global early stage
Venture	Series A 300–450M FBU + DFI
Sustainability	Subsidiary P&Ls; each unit must justify capital

Regional Expansion

Bootstrap	Reinvest free cash from PAY & CLOUD
Revenue	Government contracts, recurring infra
Grants	Sovereign digital programs
Partnerships	Pan-African banks, Visa/Mastercard
Investors	Growth equity
Venture	Series B/C 1,2–2,4 Mds FBU + DFI co-invest
Sustainability	Treasury function + FX hedging

Infrastructure Leadership

Bootstrap	Cash-generating infra products
Revenue	Diversified — PAY, CLOUD, DATA, COMPUTE, ACADEMY
Grants	Climate-tech, AI sovereignty programs
Partnerships	AU, EAC, sovereign funds
Investors	Pre-IPO, sovereign LPs
Venture	IPO or strategic minority
Sustainability	Long-duration capital matched to long-duration infrastructure

9. Execution Playbook

My Satoshis

Now	Stabilize ops, compliance, merchant pilot
Later	Cross-border corridors, BaaS APIs
Outsource	Audit, pen-tests
Keep internal	Core ledger, KYC, treasury
Automate	Reconciliation, KYC scoring, fraud rules
Keep manual	High-value approvals, sanctioned-country reviews

LEARN BTC → SIGHT ACADEMY

Now	Standardize cohort content, certificates
Later	Accredited diplomas, corporate training
Outsource	Specialist instructors initially
Keep internal	Curriculum, alumni community, LMS
Automate	Enrollment, grading, certificates
Keep manual	Mentorship, capstone reviews

Africa Fintech Journal

Now	Editorial cadence, newsletter growth
Later	Research products, summit, indices
Outsource	Distribution, video production
Keep internal	Editorial, data, brand
Automate	Publishing, analytics, lead capture
Keep manual	Editorial judgment, source relationships

Yepo

Now	Provider integrations, billing, prompt library

Later	Vertical agents, local LLMs, compute
Outsource	Model hosting (today)
Keep internal	Routing, billing, prompt IP, evals
Automate	Provisioning, billing, eval pipelines
Keep manual	Enterprise onboarding, custom agents

SIGHT PAY

Now	Plan rails design, regulator engagement
Later	Cross-border, BaaS
Outsource	Card network certifications
Keep internal	Switch, risk engine, treasury
Automate	Settlement, reconciliation, fraud
Keep manual	Bank partnerships, regulator reporting

SIGHT CLOUD

Now	Region 1 design + Tier-III partner
Later	Multi-region, sovereign certifications
Outsource	Power, physical security, hardware lease
Keep internal	Control plane, identity, billing
Automate	Provisioning, monitoring, patching
Keep manual	Customer onboarding (early)

SIGHT ID

Now	Reusable KYC across group products
Later	Open ID provider for third parties
Outsource	Document liveness vendors initially
Keep internal	Identity graph, consent ledger
Automate	Verification, revocation, audit logs

Keep manual	Edge-case identity disputes

10. Ecosystem Map

Group

- SIGHT AFRICA (holding)
- SIGHT CAPITAL

Closing Note

SIGHT AFRICA is not a website builder. It is a long-term institutional bet on African-owned digital infrastructure. This document is the single canonical reference for founders, employees, investors and partners over the next ten years.

Confidential — for internal and authorized stakeholders only.
